

Manifoldly Accessible

As a modern web application Pharmalyzer is with you **anytime** and **everywhere**. Whether on **PC** in the office, by **tablet** at the meeting or from **smartphone** on the way. A **standard compliant browser** is all you need.

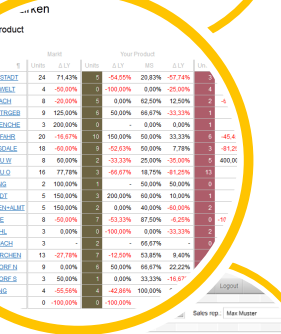

National Overview

A bunch of views exhibit a **transparent insight** by **comparing** recent developments with **previous months** and **years**.

Regional Overview

In that way possible **weak points** can be **identified** quickly and **corrected** by selective marketing.

Sales Rep Overview

Benchmarks

To outline the **most important data** Pharmalyzer completes the picture with individual **diagrams**. It uses an **extensive charting system** that **outperforms spreadsheet** processing in that way.

Rapidly Imported

- 1  Upload the original IMS archive
- 2  Check imported data
- 3  Confirm... Done!

In many situations **using standard software**, data tables have to be **copied by hand** and must be assigned to your sales reps in some **odd way**. With Pharmalyzer this is **done** in only **three short steps**.

Fully Customizable

Whether it's colors, charts, tables or whole overviews: We customize every detail to the individual desires of our customers.

Arbitrarily Extendable

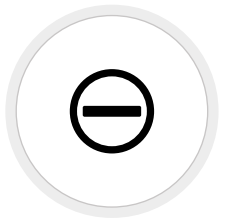

If there is a view, benchmark, index or function we do not have in our portfolio yet, please tell us. We will program it for you.

Optionally Localizable

The Pharmalyzer is basically designed for multilingual interface and any currency. This makes it ideal for international use.

Flexibly Restrictable

A comprehensive and extendable system of rights gives control over the flow of information at group or even user level in minute detail.

System Security

- Established security mechanisms
- SSL encrypted • Firewall

Password Security

- Strict policy
- Salted hash (BCrypt)

Data Security

- Redundant storage systems
- 4 daily backups • 3 destinations
- 100+ km apart from each other

Let's start a Fruitful Dialogue

We will gladly answer all your questions. By email, phone or in an on-site discussion.
